Art Unit: 1614

DETAILED ACTION

Election/Restrictions

- This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a synergistic composition comprising a factor Xa inhibitor and aspirin
 - II. a synergistic composition comprising a factor Xa inhibitor and TPA
 - III. a synergistic composition comprising a factor Xa inhibitor and a GPIIb/IIIa
- IV. a synergistic composition comprising a factor Xa inhibitor and a low modlecular weight heparin
 - V. a synergistic composition comprising a factor Xa inhibitor and heparin.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic. The groups I-V contain patentably distinct species wherein the combinations thereof are independent and distinct, each from the other, as they have acquired a separate status in the art and/or require independent searches. It is noted that a reference to one enhanced combination of drugs would not be a reference to another combination of drugs under U.S. C. 103. Further, the claims read on a multitue of enhanced combinations of drugs which would require many field of searches that would be an undue burden on the examiner. Therefore, restriction/election for examination purposes is proper.

Application/Control Number: 09/519,188

Art Unit: 1614

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. They were previously examined together on the merits, this examiner noted that it is proper to make the election requirement if there is distinctness and independence any time before final action, even though the inventions were grouped together in the parent application. 37 CFR 1.142(a), see MPEP 811-811.04. Restriction requirement is necessary for the complete and accurate examination. Because the inventions are distinct for the reasons set forth immediately above and have acquired a separate

Page 4

status in the art and the search required for each group is not same, wherein a reference which anticipates the combination of Group I would not render the invention of Group II-V obvious, absent ancillary art, election requirement for examination purposes as indicated is proper. The search of entire groups and/or genus in the non-patent literature(especially, non-patent literature) and database search (a significant part of a thorough examination) would be burdensome, it is undue burden for examiner for the accurate.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is (703) 305-1675 (Tuesday-Friday: 8AM-6:30PM).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
